## Archbar Trucks Kit

**Kit**  
**\$350**

**RTR**  
**\$395**

**Bolt together kit. No machining required.**

**You supply basic hand tools, paint and some threadlocker.**

**Four bolt pattern of upper bolster half can turn almost anything into a car. A chunk of plywood even. (very flat car)**

**Wheels are machined cast iron with tread diameter of 4 & 1/8"**

**Pressed onto 3/4" axles, which are then fitted with sealed R8 bearings. No lubrication required.**

**Total width of complete truck is 11 1/2".**

**Top of split bolster to railhead is 4 & 3/16"**

**Axles are 9 & 1/4" between centers.**

**Total length of truck is 13 & 1/2"**

**Weight of each truck is about 18 lb.**

**Carrying capacity is easily 300 lb each truck.**

**(Springs bottom out at about 5/8" movement over 300 lb.)**

**Set your coupler height about 1/8" above normal to prevent inadvertently uncoupling at real heavy loads.**

**Included springplank insures good tracking and durability.**

**Not including painting, about one hour assembly each truck.**

**A delightful kit that's easy and fun to build. Will give years of service.**
